Waritnun Anupat, MD

Physician and Field Epidemiologist | AI-Assisted Digital Health Product Development

Bangkok, Thailand | +66 87 508 3506 | anupatwritnun@gmail.com
namwaaok.vercel.app | linkedin.com/in/waritnun-anupat-505653128 | github.com/namwaafetp-commits

PROFILE

Physician and third-year Preventive Medicine (Epidemiology) resident in Thailand's Field Epidemiology Training Program, with five years of clinical practice in Krabi. Designs digital health tools from the clinical workflow up and builds them with AI coding assistants. Led the team that won Track 5 of the DTAM Digital Health & AI Hackathon 2026. Main interest: home monitoring and follow-up for chronic disease.

AWARD

Winner, Track 5 (Folk Medicine) October 2026

DTAM Thai Traditional Medicine Digital Health & AI Hackathon 2026, Ministry of Public Health

Saman Nearby (สมานใกล้บ้าน) | Team lead, clinical and product

- Referral prototype linking folk healers, village health volunteers and primary-care units, with AI-assisted drafting and human review.
- Led clinical review, product direction and the pitch.

Prototype: saman-herbal-safety.vercel.app/nearby/refer/split

DIGITAL HEALTH PROJECTS

Plathong | Home blood-pressure monitoring on LINE — plathong.vercel.app

- Patients photograph their BP monitor, AI reads the values, the patient confirms, and a dashboard shows trends for the doctor.
- PI of an ethics-approved controlled study in Krabi (KBO-IRB 2026/13.0109), enrolling from November 2026.

Built with: LINE Messaging API and LIFF, React, n8n, Supabase, AI vision OCR

Episignal | Open outbreak intelligence — github.com/namwaafetp-commits/EpiSignal

- Collects outbreak reports from news, WHO and ECDC, then uses AI to sort and map them as events, each linked to its source.

Built with: Python, FastAPI, PostgreSQL/PostGIS, Next.js, MapLibre

EpiTools | Surveillance reference and flood toolkit — epitools-sigma.vercel.app

- Phone reference for 111 notifiable diseases, built from the DDC case-definition manual.
- Offline leptospirosis screening tool for flood response, feeding an EOC dashboard.

Built with: Next.js, Leaflet, Google Apps Script

Dog-Bite-Me | Rabies guide in Thai, English and Burmese — dog-bite-me.vercel.app

- Offline web app based on the Thai rabies guideline: bite triage, wound care and a printable vaccine card.

Built with: React, Vite, progressive web app

SKILLS

Programming	R, Python and SQL for data management and epidemiologic and spatial analysis
AI-assisted development	Builds web and LINE apps with Claude Code and Codex: writes the spec, directs the build, reviews and tests
Technical understanding	How frontend, backend and database fit together; deployment on GitHub and Vercel
Product and clinical	Clinical workflow mapping, usability testing (SUS), privacy by design (PDPA)
Presentation	Conference talks, hackathon pitching, animated health education videos
Languages	Thai (native), English (professional)

EXPERIENCE

Medical Officer and Preventive Medicine Resident (FETP) 2024 to present

Division of Epidemiology, Department of Disease Control, Ministry of Public Health

- Outbreak investigation, disease surveillance and preventive medicine.

Medical Officer | Khlong Thom Hospital, Krabi 2020 to 2024

Medical Officer | Krabi Hospital, Krabi 2019 to 2020
